Indian Streams Research Journal

International Recognize Multidisciplinary Research Journal

This is to certify that our Editorial, Advisory, and Review Board Accepted Research Paper of **L. Venkatesan and N. Jothi Narendiran** Topic:- **A Statically Reports Of Diabetes Affected People In Villupuram District Through Age Wise** College:-**Department of Advanced Zoology and Biotechnology, Government Arts College for Men (Autonomous), Nandanam, Chennai, Tamil Nadu.** The Research paper is Original & Innovative it is Done Double Blind Peer Reviewed. Your Article is Published in The Month of **Nov** Year **2014**.

ABSTRACT:

Diabetes mellitus and its complications have proven to be parts of the major public health problems in Inida and it has called for the need to carry out research works on how to minimize these problems. The main purpose of this statistical reports to support to produce information about prevention of diabetes mellitus complications among adults and the aim is to produce a guide for the public use. Systematic literature review was used to analyse the data.

Abstract Report: The Title Accurately Said The Study was About.

INTRODUCTION:

Diabetes is a metabolic disease that is diagnosed on the basis of sustained high concentration of glucose in the blood, According to the World Health Organization (WHO). Diabetes occurs when the pancreas does not produce enough insulin, or when the body cannot effectively use the insulin it produces. Type 1 diabetes results from autoimmune mediated destruction of the beta cells of the pancreas (Alberti and Zimmet, 1998).

Introduction Report: This Article Include Full Introduction, Methods, Results & Introduction Section.

METHODS & MATERIALS:

This method describes how and under what conditions the empirical data underlying this publication have been produced. Empirical data were gathered procedurally over a period of one year.

Methods & Materials Report: Tables/Boxes/Diagram & Images are Used to Explain Specific Points or Background Information. Figures That The Plotted Parameters are Clearly Mentioned.

RESULT:

The statically reports shows that male patient have high risk factors when compared to females, here we collected data more than 650 people in government and private hospital in and around villupuram district and compare to this two data there are more number of male patients affects by diabetes these is the preliminary work, further studies have been carried out to risk complications and prevent of diabetes.

Result Report: Figures are Imported to Provide Explanation for Background Information. Conclusion of This Paper Clearly Supported Results.
