ABSTRACT

Human Development Index is used for measuring the human capabilities and potentialities considering the indicators of health, education and standard of living. As per the 2014 human development report Norway ranked 1st by scoring highest index value and India's position was 135th with HDI value 0.586 out of 187 countries of the worlds and state of Maharashtra's   HDI has shown 0.752 which infers its comparatively better position.

Associate Professor and Head, Department of Geography, D. B. J. Collage, Chiplun, Dist. Ratnagiri

1

Introduction

Human Development is a measure of regional or national development combining indices of health, education and living standards.

A Good Introduction : -

Importance of the expected results to the general inqu Extremely briefy depict the exploratory configuration and how it achieved the expressed destinations.

Materials

The composite index of the human development was constructed at tehsil level considering indices like literacy rate (Above 7), which is a minimum necessary requirement for acquisition and expression of knowledge, pure drinking water is essential for good health.

A Good Materials : -

Materials may be accounted for in a different passage or else they may be distinguished alongside your systems.Inc or supplies that are not generally found in research centers.

Result

Must add result in your article.

A Good Result : -

Results are as per aims and objective and useful to further research .

Conclusion

Out of a dozen villages, four villages viz. Velneshwar in Guhagar tehsil, Devacha gothane in Rajapur tehsil, Swari in Mandangarh and Ukashi in Ratnagiri tehsil are the most lagging ones in terms of human development as they are lacking necessary infrastructural and living conditions.

A Good Conclusion : -

Thus,the research have wider scope for new academician and research scholars.

REVIEWER COMMENTS

- This was a superb give an account of extremely intensive examination.
- The writing audit was careful, the approach was carefully exhaustive and fused the utilization of sufficient quantities of tests in dust size examination and blast tests.
