Indiramma . B. S

ABSTRACT

Adolescence, which spans from 10 to 19 years has been described as a transition stage in which physiological, anatomical and psychological changes take place in an individual. This stage is also considered as the period of emotional turmoil. Many adolescents manage this transformation successfully while others experience major stress and find themselves engaging in behaviours that place their well-being at risk.

REVIEW OF THE ARTICLE

Influence Of An Education Program On Knowledge About Selected Aspects Of Sexual Health Education Among Adolescent Girls

Indiramma B.S.and Amitha. V

Introduction:

Author clearly defined research problem or topic. Author clearly stated the significance of the area under study. Introduction is justifying. It throw light on the fact that, Adolescence begins with rapid changes in height, weight, body contour and sexual characteristics such as enlargement of breasts, growth of pubic hair and facial hair , and deepening of voice (Santrock,2011). It is the period of important physio-logical and psycho- logical changes Significance of the area under study mentioned clearly in Introduction. Core issues or research variables were identified.

Reference to the Literature and Documentation:

While reviewing the literature researcher present the fact that ,most of the adolescents do not have the correct knowledge about the risky behaviors that occur during this period. Many adolescents are not emotional ly prepared to handle risky experiences, especially in early adolescence

In Literature review add some researches regrading the current study.

Methodology:

Aims and objectives were stated clearly and according to the need of the study. Research procedure was described in detail and it was not confusing. Must add separate point for data analysis procedure.

Presentation of Results:

Author's major findings clearly presented. The amount of data presented was sufficient and appropriate. The results were complete. The data reported were accurate (e.g., numbers add up) and appropriate; tables and figures were used effectively and agree with the text.

Points to Improve:

Must suggest direction for further research.

Scientific Conduct:

There were no instances of plagiarism. Ideas and materials of others were correctly attributed.

Relevance:

The study was relevant to the mission of the journal or its audience. The study addresses important problems or issues; the study was worth doing.

SUMMARY OF ARTICLE

No.		Very High	High	Average	Low	Very Low
1.	Interest of the topic to the readers	✓				
2.	Originally & Novelty of the ideas		✓			
3.	Importance of the proposed ideas		✓			
4.	Timelines	✓				
5.	Sufficient information to support the assertions made & conclusion drawn			✓		
6.	Quality of writing (Organization, Clarity, Accuracy Grammer)		✓			
7.	References & Citation (Up-to-date, Appropriate Sufficient)	✓				

FUTURE RESEARCH SCOPE:

1. Psychological contract.
2. Employee Engagement.
3. Talent management.
4. Human capital management.
5. Green HRM.
