#### **ABSTRACT:**

The problem statement was clear and well articulated The study is designated to assess the Nutrition and Health status of rural population in Chamrajnagar District. Endemic poverty and rapid growth of population, inadequate nutrition and insanitary living conditions is the root of all types of health & health related problems. When a large number of people live in poor households located in crowd and in insanitary surrounding, communicable diseases spread easily and high mortality and morbidity result, particularly in the case of children.

#### **INTRODUCTION:**

The introduction provides a good, generalized background of the topic that quickly gives the reader an appreciation Nutrition has been a major health issue in India for centuries. It is a key to developing and maintaining a state of health that is optimal. Good nutrition requires a satisfactory diet, which is capable of supporting the individual consuming it. Nutritional status can be evaluated using internationally accepted BMI guidelines. World Health Organization (1995) has recommended that anthropometry could be used to assess the nutritional and health status of adults.

#### **METHODOLOGY:**

This study was conceptual in nature. Author described a variable under study in detail. The present study attempts to examine nutrition and health status with special reference to rural households of Chamrajnagar District. This study based on primary data. The identified variables are correlated with respect to respondent socio economic status and thereby it gives analytical orientation to the study.

#### **PRESENTATION OF RESULTS:**

The amount of data presented was sufficient and appropriate. Tables, graphs, or figures were used judiciously and agree with the text In this chapter the findings of the study are summarized and presented for this present work "Nutrition and Health status with special reference to rural population of Chamrajnagar district". From study it is found that most of the respondents nearly 70 percent are literate.

#### **REFERENCES:**

Prior publication by the author(s) of substantial portions of the data or study was appropriately acknowledged.

#### **RELEVANCE:**

The paper is properly organized and demands appreciation. I think the paper will satisfy the interest of the readers.
