REVIEW OF THE ARTICLE

Relationship Between Psychological Wellbeing And Self-Efficacy Among Medical Professionals-a Correlative Study

Madhuchandra, M.K.¹ and Srimathi, N. L.²

ABSTRACT:

The problem statement was clear and well articulated. The present study examines the Relationship between psychological wellbeing and self-efficacy among medical professionals. A total sample of 600 medical professionals (doctors-300, nurses-300) were selected randomly from Bangalore City. Information was collected from using an instrument developed by Ryff's-Medium Form of Psychological Well Being Scale (PWBS) and Singh and Kumar general self-efficacy scale.

INTRODUCTION:

The introduction provides a good, generalized background of the topic that quickly gives the reader an appreciation. The main purpose of the present study was to analyse the relationship between psychological well-being and self-efficacy among medical professionals in a sample of doctors and nurses from various government and private hospitals and health centres in Bangalore city. The significance of the present study is to study the combination of psychological wellbeing and self-efficacy across doctors and nurses, since the majority of previous research has concentrated on one type of medical professional.

METHODOLOGY:

The present study was exclusively realized on secondary data sources. It was purely descriptive type of research since it describes the facts relating to the problem. Based on random sampling technique, the overall medical professionals (doctors and nurses) for this study covered 600. Out of them, 300 doctors and 300 nurses were included in this study. Sample was drawn from different private and government hospitals of Bangalore city.

PRESENTATION OF RESULTS:

The amount of data presented was sufficient and appropriate. Tables, graphs, or figures were used judiciously and agree with the text. The finding of the study revealed that there is a significant and positive relationship between self-efficacy and psychological wellbeing among medical professionals. Across doctors and nurses also the same findings were observed.

REFERENCES:

Prior publication by the author(s) of substantial portions of the data or study was appropriately acknowledged.

RELEVANCE:

The study was relevant to the mission of the journal or its audience. The study addresses important problems or issues; the study was worth doing.

FUTURE RESEARCH SCOPE:

1. Career For Faculty (<http://academicprofile.org/Professor/CareerForFaculty.aspx>)
2. Academic Plan (<http://academicprofile.org/Professor/AcademicPlan.aspx>)
3. Regarding Professor Promotion
(<http://academicprofile.org/Professor/regardingPromotion.aspx>)
4. Fellowship for Post Doctoral (<http://academicprofile.org/Professor/FellowshipForPD.aspx>)
5. Online Course on Research (<http://onlineresearch.in/Default.aspx>)

SUMMARY OF ARTICLE

		Very High	High	Average	Low	Very Low
1.	Interest of the topic to the readers		✓			
2.	Originally & Novelty of the ideas	✓				
3.	Importance of the proposed ideas		✓			
4.	Timelines			✓		
5.	Sufficient information to support the assertions made & conclusion drawn	✓				
6.	Quality of writing(Organization, Clarity, Accuracy Grammer)			✓		
7.	References & Citation(Up-to-date, Appropriate Sufficient)	✓				

Future Research Suggestions

This Article can expand further research for MINOR/MAJOR Research Project at UGC
