REVIEW OF THE ARTICLE

An Analytical Study Of The Seven Ways For Eradicating Asava (cankers)

Vicittalankara

ABSTRACT:

The problem statement was clear and well articulated The Buddhist view is that we are unable to know asava due to our avijja. On the other hand, we can be free from all suffering only through the destruction of asava which is the condition for the arising of avijja. For the solution of this problem the Buddha preaches the seven ways of abandoning of asava in Sabbasavasutta, Majjhimanikaya.

INTRODUCTION:

The introduction provides a good, generalized background of the topic that quickly gives the reader an appreciation Asava appears in many phases. Since the asavas are described as illness (roga) and unwholesome (akusala), they are factors that should be abandoned. In the Sabbasavasutta seven ways of abandoning of asava are described: (1) Asavas to be abandoned by seeing = (asavadassanapahatabba) (2) Asavas to be abandoned by restraining =(asavasamvarapahatabba) (3) Asavas to be abandoned by using = (asavapatisevanapahatabba) (4) Asavas to be abandoned by enduring =(asavaadhivasanapahatabba) (5) Asavas to be abandoned by avoiding =(asavaparivajjanapahatabba) (6) Asavas to be abandoned by removing =(asavavinodanapahatabba) (7) Asavas to be abandoned by developing = (asavabhavanapahatabba)

METHODOLOGY:

Author has not mentioned any specific methodology. This study was descriptive in nature. Must add methodology in your article. Methodology used to per research topic.

PRESENTATION OF RESULTS:

Must add result in your article.

A Good Result: -

Results are as per aims and objective and useful to further research.

REFERENCES:

Prior publication by the author(s) of substantial portions of the data or study was appropriately acknowledged.

RELEVANCE:

The study was relevant to the mission of the journal or its audience. The study addresses important problems or issues; the study was worth doing.
