Indian Streams Research Journal is a multidisciplinary research journal, published monthly in English, Hindi & Marathi Language. All research papers submitted to the journal will be double - blind peer reviewed referred by members of the editorial board. Readers will include investigator in universities, research institutes government and industry with research interest in the general subjects.

THE REAL SCIENCE (THESIS REGARDING MIRACULOUS SCIENCE IN HINDUISM)

Praveen Krishnan

M.Tech(Chem.), DCT., DFT., DIS., PGDCA.
Proprietor R.K.Offset Press

Abs tract:-In this modern world we believe Science more than God. My inner soul tells me that there are great scientific miracles behind Hindu religion. So with my extra sensory perception I started my analysis. Finally I write my own findings and submit before you all. I can challenge that the results of my predictions will one day come true. Please go through this thesis and recognize me if you think this is worthful.

Keyw ords:Science , scientific miracles , analysis , history.

INTRODUCTION

Siddha Medicine

First we can start with Siddha Medicine. As per history, Siddha medicine was written by Siddhar (Saints) who had lived a long ago. They wrote the medicine secretes with their Spiritual Power, which is true. Because the God can only direct them to write those wonderful medicine.

As per Science it may be possible by trial & error method. But in this modern world itself we are unable to find medicine for dangerous diseases such as AIDS, Cancer, diabetes and many more. Even though we are supplied with many scientific instruments and formulas we are in vain. Years of research made nothing.

In this way in olden age if they use a trial & error method to find a medicine for a particular disease, it may took few hundred years to find a remedy after sacrificing many people's life. But this has not happened. Preparation of Siddha medicine is very critical since different ingredients are entirely from different places & plants and in varying quantities. Again while consuming the medicine we should follow a strict diet control. We should avoid particular vegetables, fruits and non-vegetarian which will differ for different medicines. This clearly proves that only Gods words were written in Siddha medicine. Which is the only the possible truth.

Temple Kumbam & the Lightening Arrester

The great scientist Benjamin Franklin invented lightening arrester while he was playing with kite. The principle is lightening is nothing but enormous voltage electricity, which travels to the earth in a shortest low resistant route. So by placing copper metal at highest place, it absorbs the lightening and transmits to the earth, thereby preventing damages to people and the building. Since copper is a good conductivity it is used in the production of lightening arrester. This has been invented just 2 centuries back, but Hindu temples built 1000's of years back had

implemented this technology. We knew that all olden Hindu Temples had few Kumbams at the top of Gopurams, which is generally made of copper or alloy of copper. This act as lightening arrester and protect the people and buildings in those days. Generally almost all buildings in those days are definitely shorter than temple Gopuram. Since the copper kumbam will get corroded by the environment conditions such as rain and heat which reduces the conductivity. So periodic kumbabishekam has been taken to clean the kumbams. So during kumbabishekam the metal will be renewed by cleaning to increase the conductivity. Thus Hindu concept is beyond the knowledge of modern science. This proves the power of Hinduism, which no one can neglect. Just think how this is possible in those days with limited knowledge? Some thing beyond human knowledge. Astronomical Wonders & the Theory of Relativity

Next we think about astronomy. As per present astronomical science there are nine planets in our solar system. The last planet in our solar system is the Pluto which we had found only in the 18th century. But thousands of years ago our Hindu religion has proved our solar family had nine planets.

How this can be possible in those days. We do not have any formulas or telescope to view the planets. Only very recently Galileo invented the telescope and found the last planets. So the only possible source is the God's own writing which is reflected in Hindu religion. Recently scientist found a new planet in our Solar system called 'Satna', at the same time Pluto has been removed from the list. Since it is not a planet until now, it is still emerging from the gaseous state. This again proves the power of Hindu religion.

In ancient days our ancestors had cleverly calculated the solar and lunar eclipses without the knowledge of mathematics. Again they had computed the movement of each planet and their period of revolution. This is behind our human knowledge in those days. The visibility of comet was also clearly calculated in those eras. There was a miraculous

relationship exists in our universe.

| | | |
|---------------|---|----------------------|
| Nava graham | - | Nine planets |
| Nava Dhaniyam | - | Nine Spices |
| Nava Rethnam | - | Nine precious stones |

In solar system the Saturn (shani) planet revolves very slowly, which is clearly mentioned in ancient astrology. How this is possible in those days? Just think the mystery.

Even though there are many spices the main classification is nine types and thus the precious stones and navarathri (nine days). Again Hindu Religion proves its power.

Now we will see about 'Maya' the illusion. As per Hindu Religion what we see is just an illusion that is the whole universe is a false image. This is absolutely true when we verify through Science. As per the scientific theory the different elements present in the universe is made of electrons, protons & neutrons. The structure & property of all electrons, protons & neutrons are the same in every atom. But the different physical & chemical properties vary only due to the total number of electrons, protons & neutrons present in that atom of that element. This clearly explains that what we see is just an illusion. When we see in depth in this universe there exists nothing only 'Maya'. By adding or removing electrons, one element can be converted into other which changes all its properties. This has been proved by science in this modern world. This truth has already proved by Hindu religion using the term 'maya'.

When we read Hindu puranas (Religious stories) we will see that in many places one day in space is equal to thousands of years in earth. Which we may think as Joke. But scientifically it is true. How?

In many Hindu puranas, 'Narathar' was the agent for contacting God with Humans for many needs. Thus when ever he goes to heaven & returns, his time has not spent more than few hours or days. But when he returns to the earth many generations will be gone. Thus he had spent only few hours or days in his journey, but earth had completed many years.

The same Principle has been scientifically proved by means of the world famous theory derived by the brilliant scientist The Einstein's 'Relativity Theory' which is $E=mc^2$. When we apply the theory practically we get the following unbelievable results. That is if we travel in space with the speed of light, we will not lose the time. We will be at that time always. If we are able to travel in the space at double the speed of light, then the time will be reverse in our life. That is we can see and talk to our previously died persons and visualise our olden period. Presently this is not possible because we had no technology to travel at the speed of light, but in future it may be.

When Einstein wrote this theory no one believes it and make him fool. But after his death scientists analysed his theory for several years and found it was true. This concept was clearly explained in Hinduism thousands of years ago. This proves the power & truth of Hindu religion.

Theory of Life Science

Now we will see about the concept of life science. Scientific law says that energy can neither be created nor be destroyed, but one form of energy can be converted into another form. ie, the quantity of energy is constant. The same concept is for mass. Mass can neither be created nor be destroyed, but one form of mass can be converted into another form. Thus the mass and energy are constant always. The same is true for life. That is life can neither be created nor be destroyed, but one form of life can be converted into another form. There the Hindu religion stands and can be explained with the following concept.

When we read the holy books of Hindus, at many place we came across the concept of rebirth. No religion except the Hindu says about life after death. When one living organism dies it reappears as another organism at some other place at the very moment of death. So the concept is; at any time the number of living organisms in the earth is constant. Number of living things in a particular species may vary, but the total number of living organisms in all species in the earth together will be always constant. ie. Total number of life is always constant in earth.

When we observe practically, in olden days the population of human beings is low but many animals exists in those days, but now those animals counting decreases and human population increases. Thus always the number of life in earth is constant. I could not sure whether plants & micro organisms include in this theory. Further in-depth study needed to find the truth, which may took many thousand years. But one day it will be proved truth.

There is a loophole in theory of mass & energy in the nuclear explosion and in the black holes of galaxy. Where mass is completely converted into energy and there exists no mass after explosion. All the mass will be converted into energy.

The same loophole exists in life science. Those who attain 'Mukthi' will not have any rebirth. That is, the particular life will not re exist in this earth. The life vanishes from earth. Thus Hinduism has proved its truth again.

Newton's Law

For every action, there is equal & opposite reaction. This law has been already explained through Hindu puranas. For every thinking there is equal & opposite benefits.

There is a story in Hindu Purana, which clearly explains this truth. An adult man goes to an astrologer to know his prediction of the future. The astrologer looks his horoscope & finds that the man's life must end today. So without saying anything he told the man that, tomorrow I will see your horoscope & tell you the detail since the sun has set already so it is not the time to see the astrology. The man believed it and return to his home, which is further away. During this time rain begins and he found an old destroyed Siva Temple on the way and he entered there to avoid wetting.

Rain continues for a while, at this mean time the man noted that the temple statue was almost destroyed and the whole building was entirely damaged to a larger extent. His mind begins to feel a lot and thinks if he had money he

would do the renovation work and take Kumbabishekam. He spend the time by thinking in mind about the work that could take place during the renovation period and his mind is full of joy that his dream temple work is going on in his mind. Finally the work finishes and new statute is placed and get ready for Kumbabishekam. Kumbabishekam has been taking place in his mind and enjoys the situation.

At this time the rain stops and his mind comes to real situation. Suddenly he noted that a king Cobra is nearby and it is ready to bite his feet. He quickly escapes from that temple and run outside, at the same time the wet old temple wall fall over the Cobra and the Cobra was dead. The man had escaped from two dangers, ie. from the fallen temple wall and from Cobra bite.

In the next morning the man again went to the astrologer. The astrologer shocked seeing the man since his predictions says his life should end yesterday itself, but how this happened? The astrologer starts to verify all his palm leaf astrological details to know the source of the man's life extension. At last the astrologer finds the solution from a palm leaf which says that a man can extend his life from death if he had built a Siva temple and done the Kumbabishekam.

Now the astrologer asks the man whether he had built any Siva Temple, but he refuses. The astrologer told him that he was telling lie. But the man told he had not construct any temple but imagined to be done and he tells the astrologer about the previous day happenings. The astrologer understand the situation & he tells him that actually his life must end yesterday itself, but due to your hearty felt imagination of construction of Siva temple your life has been extended.

This story clearly proves that for every mental thoughts there was equal and opposite beneficial effects. Thus the Newton's law has already proved in the Hindu concepts.

Recent study shows that some people where undergone mind therapy such that daily one hour the people are made to think such that they were doing heavy exercise. After the observation it shows the person sweats and gets almost 80% benefit from the actual exercise. Thus the truth continuous.

In many Hindu puranas (religious story) we can see that each drop of blood from Ratchasan (Living things like man with extraordinary power against God's power) will produce a new life. This has now come to true with the help of cloning technology. The wordings from Hindu Purana comes to prove in this modern world.

My Predictions:

The elements in the earth is made with numerous atoms. Each atom has its own electrons, protons, neutrons & Positrons. Every individual electrons, protons, neutrons & positrons are the same for all elements, only their counting differs. This creates their varying properties. Thus when we go to the smallest unit there exists nothing. So in every living & non – living thing the basic unit is the same.

The objects are made only using superstitious power or attraction which binds the atoms together. So if we

could found the secrete of bonding energy and the technique by which the object can be split to its smallest units, we can do wonders. Think a man; he was split into basic units which is a bunch of rays or energy. This can be easily transmitted through space or through wire at the speed of light, at the other end by knowing the bonding technology we can reunite the basic units to rebuild the original man. Thus travelling from one end to other becomes quicker. By knowing the bonding codes of the particular living or non – living thing it can be easily transmitted through space or cable and at the other end by rebonding using the formula the original material can be made. Thus travelling through space becomes easier and quicker. Thus with in 15 secs we can reach the moon, ie. at the speed of light. My sense predicts it is possible in future.

RESULT OF MY PREDICTIONS:

1.The count of living things in earth is constant at all time.
2.We can travel at the speed of light by splitting objects into its smaller units.

3 Each star has its own solar system in which few planets will be revolving around the star. In that only one planet living things will exists.

4 By continuous intensive research in Hindu puranas we will get solutions for non solvable problems by the modern science, such as the origin of life.
