ABSTRACT:

This study is meant to be an exploratory study which intends to point out whether there is any difference between the usage of internet among Arab and Non-Arab students, Moreover, it intends to investigate the possible similarities of internet usage purpose.

Abstract Report: The Title Accurately Said The Study was About.

INTRODUCTION:

In the past 20 years the importance of technological support of the learning environment has become a major focus in trying to improve the facilities and education related services at all high learning institutions. With this in mind, the institutions have to rethink or remodel their way of teaching as they reevaluate the effectiveness of their teaching and learning strategies.

Introduction Report: This Article Include Full Introduction, Methods, Results & Introduction Section.

METHODS & MATERIALS:

This research is based on theoretical studies, as well as based on empirical study, which enable the use of questionnaire and to collect adequate data from potential users of internet. It is very important to apply both studies because the two types of studies will form one collective platform to exemplify and reflect the outcome of the research to the research questions.

Methods & Materials Report: Tables/Boxes/Diagram & Images are Used to Explain Specific Points or Background Information. Figures That The Plotted Parameters are Clearly Mentioned.

RESULT:

This research used qualitative data analysis techniques to interpret the collected data. The data was analyzed using SPSS in order to come out with reliability test and some other statistical feature to support the hypothesis of this research. The statistical analysis involved several steps such as building reliability.

Result Report: Figures are Imported to Provide Explanation for Background Information. Conclusion of This Paper Clearly Supported Results.

CONCLUSION:

This study contains the preliminary introduction of the thesis. First of all, the introduction to the study was presented, which included the background of the study. Next, the problem statement describes the problem, which is discussed in this study. The research objective is listed down connected with the research questions. The research questions are carefully designed in order to guide the research till the result.

Conclusion Report: The Text is Rounded off with a Conclusion that Discusses the Implication of The Findings & Ideas Discussed & Their Impact on Future Research Direction.
